## NORTHEAST DIGITAL INTEGRATORS SELECTED AS AV SYSTEMS INSTALLER FOR CONCERT PHARMACEUTICALS

Lexington, MA: May 30, 2018– Concert Pharmaceuticals Headquarters

Northeast Digital Integrators, a Nashua NH company specializing in designing and installing innovative audio-visual systems, was recently awarded the contract to install new audio/visual systems for Concert Pharmaceuticals, located in Lexington, MA. Concert Pharmaceuticals (NASDAQ: CNCE) is moving their headquarters to accommodate business growth and needs A/V systems to facilitate meetings and training opportunities.

The project will include systems integration throughout Concert’s new location. In the corporate boardroom, NEDI will integrate a Hitachi laser video projector with screen. This will be controlled by a Crestron wireless touch panel that will manage all the AV functionality in the room. A Clearone ceiling mounted beamforming microphone array will include 24 microphones to allow for conferencing sound.

A multipurpose room for events, large meetings, and a cafeteria will also include a laser projector and a sound system operated by a recessed Creston 20-button control panel.

To finish the project, NEDI will outfit seven conference rooms that serve as huddle spaces for employee meetings. These rooms have either large television displays or projection screens depending on the size of the rooms. When possible, NEDI will redeploy existing equipment from the previous location to this new setting to allow Concert to maximize their previous investment.

“What really sets us apart is that we are very responsive and as a local company we have the same capabilities if not more than the national chains but where we really shine is after sale service.” Says Nate Anderson, owner of NEDI.

“We make sure everyone is properly trained and understands how to use the system’s full capabilities and if anything goes wrong, we are right there to help!”

If you would like more information about this topic, please contact Nathan Anderson at 603-262-5875 or email at nanderson@nedi-av.com.

Northeast Digital Integrators, a locally owned audio-visual systems integrator has been designing and installing digital systems for numerous institutions such as Boston University, MIT, University of New Hampshire, and many educational and corporate clients throughout New England. What NEDI brought to this project and all its projects is expertise, value, and personalized service.
